## Work Experience

### FullStack Developer

April 1 2024 - Present

Brooksource at Evernorth

- Refactored an internal prescription review web app from Spring MVC + JSP to Spring Boot + React, transitioned to a front-end and back-end separation model using Spring Boot, React, Redux, React Router, and TypeScript, optimizing the architecture and enhancing maintainability.
- Increased application reliability by integrating unit tests, boosting test coverage from 55% to 85% with React Testing Library and Jest, which improved code quality and reduced bugs especially for reused UI components.
- Engineered and deployed frontend infrastructure on AWS with CDK, integrated comprehensive monitor metrics and alert configuration to ensure high availability and performance of web applications.
- Fortified security and performance by implementing front-end input validation components with React, reduced invalid data inputs to API endpoints by 80%, mitigated vulnerabilities, and improved user efficiency.
- Implemented RTK Query and Redux in React applications, improving state management and consistency across the single-web application.
- Led cross-functional collaboration with the product team to ensure technical solutions aligned with business specifications, enhanced project coherence and stakeholder satisfaction.

### Frontend Developer

March 2023 - September 2023

iHealth and Wellness Foundation, Inc

- Created the official website from the ground up using Nextjs, TypeScript, React, and Tailwindcss, establishing an online presence to showcase the venture's vision and objectives.
- Implemented dark mode using CSS variables and Next.js, enabling smooth color switching and caching user preferences to enhance user experience.
- Implemented i18n using react-i18next to support text translation for 5 languages, different time zones, and currency units enhanced global usability.
- Collaborated with the backend team to document RESTful APIs using OpenAPI annotations, generating TypeScript definitions for seamless frontend-backend integration.
- Supported on-call operations by analyzing frontend JavaScript errors to identify edge cases and resolve browser compatibility issues.

## Education

### University of Massachusetts

Online | March 2023 - Present

Bachelor of Science, Major in Information Technology

### University of Massachusetts

Amherst, MA | September 2015 - May 2019

Bachelor of Science, Major in Mathematics

## Skills

**Programming Languages:** JavaScript, TypeScript, Nodejs, Java, SQL, HTML5, CSS, Python

**Development Technologies:** React, Redux, React-Router, Nextjs, Material UI, Tailwindcss, Express, Mysql, Spring Boot

**Testing and Tools:** Jenkins, AWS, Cucumber, JUnit, Mockito, Jest, React Testing Library, Cypress

## Projects

Short-Term Rental Marketplace with React, Redux, and Express.

[Live Site](#) | [GitHub](#)

WebSockets-based Group Chat Application with React, Python, Flask, SQLAlchemy

[Live Site](#) | [GitHub](#)

Dog Social Networking Platform with React, Express, Firebase
